<html>
  <head>
    <title> My First HTML Page </title>
    <link rel="stylesheet" href="ex2.css" />

    <script>
      function fun1 () {
       var a = document.getElementById("un").value;
       var b = document.getElementById("pw").value;
       alert(a + " --- " + b);
       document.getElementById("new").innerHTML = "Button Clicked";
      }
    </script>
  </head>
  <body>
```

```
        <center>
            <div id = "div1">
                <p style="text-shadow: 1px 2px 4px yellow, -2px -2px 4px rgb(21, 102, 10);"><b><i><u> Login Box </u></i></b></p>
                <br/>
                <br/>
                username: <input type="text" id="un" />
                <br/>
                password: <input type="password" id="pw" />
                <br/>
                <br/>
                <button onclick="fun1()"> Login </button>
                <div id = "new">  </div>
            </center>
        </div>
    </body>
</html>
```

1.6 Result:

Login Box
